

# About Graphictac

## 100% Made in Taiwan Supply worldwide

Made in Taiwan product is now known for its quality around the world, because we don't cut corners and integrity is valued over profit. Graphictac is 100% produced in Taiwan, all components are sourced and made in Taiwan to ensure consistent quality over time. Even though we produce locally in Taiwan, our marketing focus is global, and we understand each market sector is uniquely different and should be treated as such, and our exclusive partners will enjoy our full support in growing their individual market.

## Japan imported paper for liner

Release liner is a crucial component of self-adhesive vinyl that can make or break the product, that's why Graphictac insists on using the more expensive premium quality paper imported from Japan to ensure the very best ingredient going into our paper release liners. The end result is a flat, even and stable liner surface that allows excellent print quality, easy cutting & weeding, well protected adhesive during storage and transportation, smooth release during installation and consistent bonding to substrates.

## Taiwan-made consistently reliable adhesive

Anyone can make adhesive system with high adhesion, but not everyone can make it non-residue, Graphictac achieved it with Taiwan made adhesive that are consistently reliable and trusted by customers worldwide. As different adhesives have varying degrees of aggression and chemical properties, our networking with a number of professional adhesive suppliers has enabled us to deal with different application requirements, factors such as temperature resistance, chemical resistance, surface characteristics, substrate compatibility...etc to avoid any bonding issues or adhesive transfer.

## Taiwan Nan Ya brand raw materials

Nan Ya Plastics Corp. (NPC) is the largest and most renowned manufacturer of plastic materials in Taiwan, and we source our PVC film from NPC to make the highest quality self-adhesive vinyl.

Given NPC's colossal size, they are able to invest heavily in the state-of-the-art equipment and machinery, put in place stringent testing and quality control procedures, as well as securing advanced R&D technology. Graphictac is confident in providing the best products to the market by working with the best in the industry.

## Industry knowhow and experienced R&D

Graphictac has a team of industry experts with years of experiences in working with diverse film constructions, adhesive properties and release liner compatibilities to meet various application requirement. You can trust our team to offer professional consultation and technical expertise to find the right product from existing range, or build the custom product for achieving the desired result.

Exceptional solution

Category	Product code	Film material	Film thickness	Finish	Ink compatibility	Adhesive	Release liner	Options	Indoor / outdoor	Durability	
Multipurpose white printing	1000-991	Polymeric	3mil 75 micron	Gloss white	   	Permanent clear non-residue	80gsm double-PE coated	Grey adhesive or Air release liner	Indoor/ Outdoor	Up to 5 years	
	1000-992			Matte white		EzPeel removable, clear repositionable, non-residue					
	1000-991R			Gloss white							
	1000-992R			Matte white							
	1000-971	Monomeric	3.3mil 85 micron	Gloss white			Permanent, clear, non-residue		140gsm single-PE coated	Up to 3 years	
	1000-972			Matte white							
	1000-980			High glossy white							
	1000-983			4mil 100 micron		High opacity gloss white					
	1000-984			High opacity matte white							
Multipurpose clear printing	1000-P990	Polymeric	3.2mil 80 micron	Ultra crystal clear	   	Permanent, clear, non-residue	3mil (75 micron) traction backed PET	N/A	Indoor/ Outdoor	Up to 5 years	
	1000-P990R					EzPeel removable, clear, repositionable, non-residue					
	1000-000	Monomeric	4mil 100 micron	Gloss clear		Permanent, clear, non-residue	80gsm double-PE coated		Up to 3 years		
Semi Rigid printing	1000-150	Monomeric	6mil 150 micron	Gloss clear	   	Permanent, clear, non-residue	90# double-PE coated	N/A	Indoor/ Outdoor	Up to 3 years	
	1000-150R			EzPeel removable, clear, repositionable, non-residue							
	1000-151			High opacity gloss white		Permanent, clear non-residue		Grey adhesive or Air release liner			
	1000-151R					EzPeel removable, clear repositionable, non-residue					
	1000-152					Permanent, clear non-residue					
	1000-152R					EzPeel removable, clear repositionable, non-residue					
Wall wraps	RoughGrip101	Polymeric	4mil 100 micron	Gloss white	   	RoughGrip high grip permanent, clear non-residue	80gsm double-PE coated	Grey adhesive or Air release liner	Indoor/ Outdoor	Up to 5 years	
	RoughGrip102			Matte white							
Light box	1000-509T	Polymeric	3.5mil 90 micron	Translucent matte white	   	translucent matte white	90# double-PE coated	N/A	Indoor/ Outdoor	Up to 5 years	
	1000-509	Monomeric	4.4mil 110 micron				80gsm double-PE coated			Up to 3 years	
Static cling	50-S01 clear	Monomeric	6mil 150 micron	Clear	   	No adhesive	140gsm single extra thick PE coated	N/A	Indoor/ Outdoor	Up to 3 years	
	50-W01 White			White							
Specialty	1000-H01X	Monomeric	4mil 100 micron	Holographic silver	   	Permanent, clear, non-residue	90# double-PE coated with <a href="#">air release</a>	N/A	Indoor/ Outdoor	Short term outdoor	
	1000-4101X 1000-4102X	Composite	4mil (100 micron) PVC/PET composite	Silver brushed metallic Gold brushed metallic		Permanent, clear non-residue	90# double-PE coated with <a href="#">air release</a>				
	1000-4201X 1000-4202X			Silver chrome metallic Gold chrome metallic		Permanent, clear non-residue	90# double-PE coated with <a href="#">air release</a>				
	Photo paper 600	Composite	Overall 12mil 300 micron	Matte white		Composite PVC/Synthetic paper					
	Roll-up media 610	Composite	Overall 10mil 250 micron	Matte white		composite PVC/PET grey back					
Dry Erase	200-ReErase00	PET	2mil 50 micron	Gloss clear	N/A	Permanent, clear, laminate adhesive	50 microns clear PET	N/A	Indoor	Up to 5 years	
	200-ReErase01			Gloss white							
Vehicle printing wraps	EzWrapX01	Polymeric	2.2mil 55 micron	Gloss white	   	EzWrap low-tack/slow-rise, <a href="#">grey *</a> , repositionable, non-residue	90# double-PE coated, <a href="#">w/MicroFlo air egress</a>	N/A	Indoor/ Outdoor	Up to 5 years	
Fleet printing wraps	1000-991GX	Polymeric	3mil 75 micron	Gloss white	   	Permanent, <a href="#">grey *</a> , non-residue	90# double-PE coated with <a href="#">air release</a>	N/A	Indoor/ Outdoor	Up to 5 years	
	1000-992GX			Matte white							
Multipurpose laminte	200-P975	Polymeric	3mil 75 micron	Ultra crystal clear	N/A	Permanent, clear, laminate adhesive	3mil (75 micron) traction backed PET	N/A	Indoor/ Outdoor	Up to 5 years	
	200-P175			Gloss clear			100gsm single extra thick PE coated				
	200-000	Monomeric	3.2mil 80 micron	Gloss clear			80gsm single-PE coated			Up to 3 years	
	200-002			Silk-matte clear							
	200-005			Matte clear							
Specialty laminate	200-TH01	Monomeric	4mil 100 micron	Transparent holographic	N/A	Permanent, clear, laminate adhesive	3mil (75 micron) traction backed PET	N/A	Indoor/ Outdoor	Up to 3 years	
	200-THG01			Transparent holographic glitter				360µm film available			
Floor graphic laminate	200-250	Monomeric	10mil 250 micron	Matte clear	N/A	Permanent, clear, laminate adhesive	80gsm single-PE coated	N/A	Indoor/ Outdoor	Up to 3 years	

Remark: \* Grey adhesive is non-residue in one year with lamination

• All durability on printable vinyl are based on laminted with compatible Graphictac's overlamine

## Most advanced technology

### • EzWrap Technology

EzWrap is an effortless wrapping technology, combining a low tack / slow rise adhesive with soft initial tack, together with MicroFlo air egress liner to allow high repositionability during installation, without diminishing the ultimate bonding strength. It offers vinyl applicators a pleasant experience and increased productivity in all application environments.

### • MicroFlow technology

This custom-tailored advanced air egress technology developed specifically for EzWrap technology and only available at Graphictac, it's comprised of tiny microscopic air channels for fast releasing of air bubbles and flowy-installing on substrate as well. You will pleasantly enjoy the smooth flow and quick wrapping experience without compromising on the bonding strength to substrate, our technology ensures a speedy and secure installation.

### • EzPeel Formulation

EzPeel is our removable solution that offers:

- Low initial adhesion allows smooth removal without overstretching the film.
- Offering superb repositionability with consistent adhesion for long-term removability.
- Easy peel enabling a clean final removal without damaging the substrate surface.
- No adhesive residue left behind after removal.
- Suitable for interior drywall wraps and decals, general signs/decal/ POP.

### • RoughGrip Formulation

Our high tack & grip adhesive solution is an aggressive and permanent PSA, designed to grip onto difficult substrates, such as metals, plywood, textured walls (i.e concrete, brick..etc), even textile (i.e. mesh fabric). We strongly recommend you to test it before ordering.
